

Case Amateur Radio Club budget for 1965-1966.

SX-117 Receiver	\$ 390
Low band antenna system, rotators beam antenna, tower, masting.	350
Qsl cards, paper, dittos, operating expenses, repairs, fuses, tubes, postage, envelopes	75
Six meter antenna assembly	30
Antenna wire, coax cable and connectors	20
Renew our subscription to three magazines	16
two headsets	30
Oscar IV satellite tracking appropriations	50
	\$ 871 961

The \$50.00 deficit in our budget from last semester has been eliminated in this final copy since we were able to make up for this by selling some surplus equipment which was donated to us by the E. E. department. The Club therefore ended up \$8.00 ahead.

Dues have been increased this year by 50 cents per semester, however if the members join the club for the full year they still pay the old rates of \$4.00 for Hams and \$2.00 for SWL's. So far all members have joined for one year. We are expecting to collect \$120.00 from dues this year. Also \$25.00 more from the sale of some more surplus equipment donated to the club. The expected income therefore totals \$145.00. We therefore request \$120.00 from the Senate funds for the year 1965-1966.

\$816

The membership of our Club has been increasing each year, since the hams on campus feel that the club has something to offer them now in the way of equipment. The membership has become more active as was shown by the high level of participation in the satellite tracking project, known as Project Oscar III.

This should be the last year that our budget will be this high. Once the Club has accumulated all the necessary equipment, it will only need money for current expenses such as paper, etc.

Our members have communicated all over the world, thus spreading good will and the Case name. We feel, therefore, that the money spent is well worth it.
